<p>Freeing Acute Capacity - Virtual, supported Monitoring for Early Discharge &amp; Safely Increasing District Nursing Caseload</p>	<p>Allows early supported discharge of elderly frail, those with underlying health conditions, those being discharged early following surgery, procedure or intervention. Also suitable for those at risk of admission (e.g. those on the GP frailty register).</p> <p>IUC providers are best placed to set up and deliver this service as they operate 24/7 and already have much of the technical and clinical infrastructure in place; supporting a safe, rapid mobilisation. Care UK would support the knowledge transfer and roll out to other IUC providers with monitoring and response capability through their 111 call centres.</p> <p>Patients discharged from hospital will be monitored by a team of clinicians 24/7 using <i>Docobo</i>, a cloud-based solution, already in use in England, allowing clinicians to work at home from their own computer, (utilising those shielding or self-isolating). Patients use a simple App on their own computer, tablet or smartphone which takes patients through questions appropriate to their conditions, at set times of day, and monitors their health via SPO2, BP monitoring and thermometer. A range of questionnaires including COVID-19 specific questions can be answered by the patient if they feel their condition changing. Algorithms determine if a patient is deteriorating and alert the clinical team.</p> <p>Our team of remote nurses and GPs are available to support patients 24/7. Providing review, advice, and rapid response to deterioration including assessment, remote prescribing, and care-planning. We will work with local teams and mobilise services if a patient deteriorates (with whatever available and relevant face to face resource is available). Crucially the alerts will enable us to prioritise care and rationed clinical resources to those that need it.</p>	<p>Mobilise in C2 weeks supporting 2000 patients at any one time; (a total of 8000 to 10000 patients over a 12-week period), this is estimated to be sufficient capacity to support immediate early discharge over at least one STP/ICS</p> <p>Care UK would support the knowledge transfer and roll out to other IUC providers with monitoring and response capability through their 111 call centres - <b>this could be 40,000 patients nationally in a 6-week period.</b></p> <p><b>Where patients don't have a home smart phone, tablet, or PC, this can be provided, and a robust multi-user device is available for use by up to 40 patients in a care or nursing home environment.</b></p>	<p>Nationwide</p>	<p><b>Care UK</b>  Suzanne Lawrence, Deputy CEO  0791 8695402  <a href="mailto:Suzanne.lawrence@careuk.com">Suzanne.lawrence@careuk.com</a>  <a href="https://www.careuk.com/">https://www.careuk.com/</a></p>

Speciality	Activity	Capacity and Mobilisation	Location	Contact
<p>Remotely delivered, digitally enabled Community MSK service, home-based for NHS patients and staff, significantly reducing the demand on Primary Care, EDs and NHS 111.</p>	<p>A service model/pathway making significant use of patient self-referral, rapid triage, remote appointments (telephone and video-based) and digital tools that allow nearly all patients to self-manage effectively, whilst quickly screening for red-flags and triaging for urgent patients. This could be delivered at individual ICS level or up to national scale. The model will make use of established pathways and resources to allow rapid deployment.</p> <p>Connect Health already deliver effective NHS Community MSK services (including physiotherapy, chronic and persistent pain and rheumatology) for 26 CCGs covering &gt;10% of England's population, with a significant element of remote treatment.</p> <p>In recent weeks, we have moved almost all patient activity to remote appointments, introducing a number of additional tools and techniques including a pioneering digital patient self-assessment app and video consultations. Our Care Coordination Centre is already operating fully from home and we can readily add additional capacity to this function.</p> <p>Like many providers we are redeploying some of our MSK clinicians to local Trusts to help with Covid-19. Some Trusts have called almost their entire MSK workforce to help leaving depleted community MSK services. As directed by NHSE and our commissioners, remaining staff continue to run reduced MSK services and importantly ensure no red flags are unattended.</p> <p>Through the MSK Partners Network, a trade body for independent MSK providers, it will be possible to corale qualified resources from many providers of MSK services from outside of the NHS (independent NHS providers and 'high street' physios). This will provide sustainable backfill for clinicians moving to front-line and beyond that, enable significant capacity for a wider service.</p>	<p>Rapidly (&lt; 4 weeks) mobilise a national or multi-regional, 'single contact' Community MSK Service bringing together multiple providers using a single pathway and set of procedures and systems.</p> <p>Allow patients to self-refer via telephone or website, avoiding presentation in primary care/ED or "111". This would reduce to an absolute minimum the number requiring secondary care support</p> <p>Able to handle upwards of 200,000 patients per month (excluding Under 16s)</p> <p>Coordinate and deploy c.290 WTE MSK clinicians and c.80 WTE supporting admin staff – arrangements already in place to mobilise this.</p>	<p>National</p>	<p><b>Connect Health</b>  Mike Turner, Chief Operating Officer  0191 250 4580  07568 428 146  <a href="mailto:miketurner@connecthealth.co.uk">miketurner@connecthealth.co.uk</a>  <a href="https://www.connecthealth.co.uk/">https://www.connecthealth.co.uk/</a></p>

<p>Elective Care &amp; Waiting List Management</p> <p>Primary Care</p>	<p>Support the NHS in managing elective care and waiting list pressures, where they might exist, in the following specialties <b>Orthopaedics, Spinal Surgery, General Surgery, Gynaecology, Urology</b> and <b>ENT</b>.</p> <p>OHG already deliver large volumes of elective care to the NHS every year on a planned basis. However, we also have significant experience of supporting the NHS in a more ad hoc way, particularly as pressures will inevitably be building up as a direct impact of COVID-19, with a high volume of elective cases already being cancelled/postponed across the country.</p> <p>OHG have a wealth of experience in working collaboratively with NHS Commissioners and directly with NHS Trusts. We are completely focused on quality, safety and positive patient outcomes. We deliver all our current work with the NHS at tariff, but fully appreciate the fallout from this virus will be huge and would look to support the NHS with discounted rates where we could.</p> <p>OHG is flexible in its approach to supporting the NHS and is able deliver services to patients from the point of referral, or to existing patients already waiting for procedures.</p> <p>All our Consultant Surgeons are extremely experienced and already work within the NHS, as well as for OHG. They are fully compliant with our own quality and safety assurance framework and have a strong track record on productivity across all our specialties.</p> <p><b>Primary Care</b></p> <p>In conjunction with our Physionet Partners, we can also offer:</p>	<p>Over 50 Surgeons across 6 specialties.</p> <p>We do not own our own Hospital and instead work from 7 Hospitals, with theatre capacity secured in each – this gives us great flexibility.</p> <p>21 Outreach clinics</p>	<p>South Yorkshire</p> <p>Derbyshire</p> <p>Notts</p> <p>West Yorkshire</p> <p>Lincolnshire</p> <p>we can add additional geographic locations very quickly</p>	<p><b>One Health Group</b>          Jessica Sellars, Associate Director of Operations          0114 3996081 / 07809214009  <a href="mailto:jessica.sellars@onehealth.co.uk">jessica.sellars@onehealth.co.uk</a>  <a href="https://onehealth.co.uk/">https://onehealth.co.uk/</a></p>

Dermatology	<p><b>A National DMC Dermatology App Service</b></p> <p><b>National backlog challenge ahead</b> An estimated 300,000 backlog of referrals is expected. The traditional clinic and personnel capacity will add further challenges to meet the predicted demand. Our experience shows that we can start meeting patients needs now, without the need to use the traditional face to face arrangements, reducing hospital clinic demand, patient and staff travel or the need for additional clinic staff.</p> <p><b>1. Repurposing our dermatology app for Trust providers - DMC response to Covid-19 challenges</b> We have a well-established tele-dermatology app and pathway of care which when combined with experienced dermatologists, resolves up to 60% of referrals by discharge back to the GP with advice and guidance. The remaining outcomes follow the need for face to face consultation, including cancer pathways.</p> <p><b>2. Integrated digital dermatology - DMC response to Covid-19 challenges</b> We have developed two new digital dermatology pathways with an integrated electronic patient record and video consultation. The pathways are proven, with data evidence of outcomes and quality. Clinician and patient feedback are very positive. These pathways are addressing patient needs already under our care and the small number of referrals still coming through.</p> <p>We have an experienced administration team and will train Trust admin staff to add capacity. Our dermatologists would be used and Trust based dermatologists would be encouraged to join in the reporting process.</p>	<p>Largest provider of community-based dermatology services in the country.</p> <p>100,000 patients a year, including level 4 services incorporating cancer pathways.</p> <p>The offer is to give the DMC tele-dermatology app to all Trust providers. The kit required is readily available; mobile phone and dermatoscope for lesion images. The staff capacity required is a trained HCA working in a clinic setting.</p> <p>An estimated 300,000 backlog of referrals is expected. The traditional clinic and personnel capacity will add further challenges to meet the predicted demand. Our experience shows that we can start meeting patients needs now</p>	National	<p><b>DMC Healthcare</b> Dr Nadeem Moghal, Chief Executive 07966039944 <a href="mailto:nadeem.moghal@dmchealthcare.co.uk">nadeem.moghal@dmchealthcare.co.uk</a> <a href="https://dmchealthcare.co.uk/">https://dmchealthcare.co.uk/</a></p>

Primary Care	<p>We are a family owned NHS care provider delivering care to over 600,000 patients per annum across registered general practice and urgent and unscheduled care. As an owner run business, we are agile; able to quickly move to new ways of work, make decisions about how to deploy resource and on where to upscale in order to support the healthcare system in these challenging times. The video clip here gives a better flavour of who we are and what we currently do and how we could spread that expertise and capacity swiftly: <a href="#">OneMedicalGroup</a></p> <ul style="list-style-type: none"> <li>• Primary care service delivery expertise and capacity.</li> <li>• Able to support with turn around and caretaking contracts, can hold all contract forms; APMS, GMS, PMS and are on the national caretaker contract frameworks.</li> <li>• NHS Pensions Employing Authority. Able to take on new NHS staff from other organisations where required.</li> <li>• Data driven capacity and workforce planning</li> <li>• Advising on moving to remote BAU care and wellbeing models;</li> <li>• Digital tools - in-house Technology Team and set of software solutions to help people live healthier lives including a Person Held Record, (not to be confused with an EHR), and suite of self-support apps that are all video enabled. We have been able to pivot the team onto splitting out the video element into a standalone product, Lincus Multiway Video, which is now on the Video Consultation Framework for primary care and could also be used for virtual outpatients, community services and group consultations; <a href="#">LincUs Health and Wellbeing Platform</a>.</li> </ul> <p>LincUs Health and Wellbeing platform is a flexible, digital, personal health and wellbeing record management and communications platform which supports users to manage their health and wellbeing including: symptom, fitness and lifestyle management. It can be used to</p>		National	<p><b>One Medical Group</b>  Sarah Everest-Ford,  System, Development and  Partnerships Director  07947412225 / 0113 2843158  <a href="mailto:newbusiness@onemedical.co.uk">newbusiness@onemedical.co.uk</a>  <a href="https://www.onemedical.com/">https://www.onemedical.com/</a></p>

	<p>monitor or manage patients, and condition groups, as well as individuals. Through data capture, analytics and visualisation. The platform is in use across maternity, learning disabilities and wider healthcare settings.</p> <ul style="list-style-type: none"> <li>• The data collated can also be used as part of population health management data sets to help inform decisions about care modelling to respond to Covid19. At this time it is essential that providers carefully monitor capacity and demand and use this information to inform forecasting for the coming weeks. Our Business Intelligence team are supporting Primary Care Networks and other providers to do this at scale.</li> <li>• OneWellness OnlineHub “OWN at home” which can be “white labelled” to different NHS organisations or they can be given access to it. Additional content is being added every day and the team are working with a wide range of specialists to make the resources as far reaching as possible – including physios, (virtual rehab clinics), health coaches, (group consultations around specific LTCs etc), PTs, (virtual fitness classes that can be accessed at any time), Lifestyle GPs, Dermatology support and advice etc.</li> </ul> <p>As already stated, this resource can be upscaled very quickly and “bespoked” as needed.</p> <ul style="list-style-type: none"> <li>• System support - through our network of urgent care centres and general practices, we are linked into a number of health care systems and geographies and are already working with system partners to redeploy staff and resource where there are lulls in some activity and spikes in others. In other geographies, we are working with the local EDs to share staff and expertise and our urgent care clinicians are supporting general practices in doing remote reviews of vulnerable patients. We have also expanded NHS 111 direct bookings into all our urgent care services.</li> </ul>			

Speciality	Activity	Capacity and Mobilisation	Location	Contact
	<ul style="list-style-type: none"> <li>• Where we already have primary and urgent care services (Yorkshire, Northamptonshire, Lake District, Northamptonshire and Derbyshire) and surrounding areas we can support with care delivery such as weight management and wellbeing, group consultations, home visits, COVID-19 testing and clinics</li> <li>• Estates support - through our OneMedicalProperty arm we are able to quickly review space utilisation and optimisation of care estate to help facilitate the care model changes needed in Covid19 e.g. where cross PCN hot and cold clinics are being set up.</li> <li>• Covid19 response co-ordination - we have implemented an internal Covid Co-ordination Team, (CCT), who have been in place for the last 4 weeks and are running our response to the crisis. We have our own internal Operational Pressures Escalation Level, (OPEL), reporting for Covid19 and are doing daily SitReps with our CCT and whole group, plus daily video briefings form senior team as referred to in point 2 above. Anecdotally, colleagues within and outside our organisation have fed back that we are one of the best prepared providers and are an exemplar of how to run a multi-site organisation with remote support in a pandemic situation. We have shared what we are doing with our local system colleagues and would be keen to share wider still with NHS E/I etc. It can quickly be rolled out across other systems</li> <li>• Project management and facilitation support – Our team have been working closely with providers across Cheshire to support the design and mobilisation of hot hubs and cross organisational services. Our work has include chairing system wide meetings through our digital platform, Lincus Multiway, the development of Standard Operating Procedures, workforce planning and patient and staff communication bulletins.</li> </ul>

Track and trace teams	<p>Offer of sexual health service track and trace teams to support COVID-19 contact tracing</p> <p>Most Local Authorities have de-prioritised sexual health services and staff are being redeployed to other NHS services. It seems to us that the infrastructure and knowledge exists in these services to track and trace people who have been diagnosed as COVID-19 positive, rather than starting a new service from scratch as appears to be happening from reports in the media. We would be happy to support NHSE convert these services across the country if required. If you know anyone who is working on this, please put us in touch. Thank you.</p>		National	<p><b>Virgin Care</b></p> <p>Vivienne McVey, CEO  <a href="mailto:Vivienne.McVey@virgincare.co.uk">Vivienne.McVey@virgincare.co.uk</a>  <a href="https://www.virgincare.co.uk">https://www.virgincare.co.uk</a></p>
