

Working together... during covid19

How NHS and independent sector partnerships are ensuring patients get the care they need during covid19

Since the end of March independent hospitals and diagnostics providers have made available to the NHS...

8,000
beds

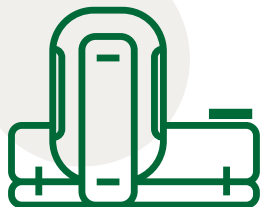

1,200
ventilators

over
10,000
nurses

33

CT scanners

300
radiographers &
clinical assistants

...enabling hundreds of thousands of NHS patients to receive treatment

Independent primary and community providers have also stepped up during covid19 to support the NHS by...

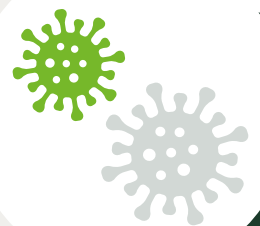

...switching from
face-to-face to **virtual**
consultations...

...repurposing
their services
to help support
the NHS...

...and working
as "hot" or "cold"
covid19 sites

...enabling thousands of
NHS patients to continue
accessing the care they need

The independent sector is committed to supporting the NHS to help the health service get back on track
