

Working together during covid19

Since the end of March 2020 independent hospitals have made available to the NHS

8,000
beds

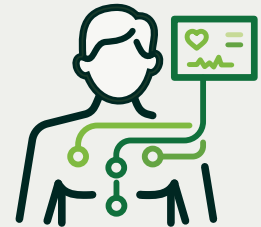

1,200
ventilators

10,000
nurses

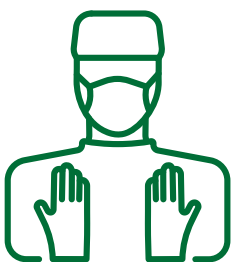

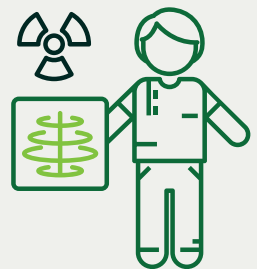

12 months on independent providers have delivered over **3 million** NHS procedures including:

160,000
cancer and cardiology treatments

1.8m
outpatient appointments

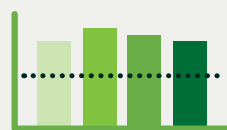

500,000
diagnostics tests conducted

90%

of independent hospital theatre time made available to the NHS was used for treating patients

Independent hospitals have **consistently outperformed** the targets set for them by the NHS

>2,000 NHS junior doctors have undertaken their training in independent hospitals during the pandemic
