

FNF Green Healthcare Leadership Programme - Project Overview

Brittany Bowen – Cardiology Clinical Lead - InHealth

Cardiac Mobile Units

The Low Carbon Alternative

Project Outcomes

1 tray, 1 pack, 1 department = 47 Kgc02e /year

1 tray, Kimal wide = 17.43 Tonnes c02e /year

Delivery from x2 per week to x1 per week =
3994 Kgc02e /year

Cost neutral with removal of unused syringe

Project Outcomes

Staff awareness of impacts of hard plastics and single use procedure packs

Cross organisation collaboration with a third party provider of consumable sharing a common goal

The ripple effect on staff who are now working hard to identify other low carbon swaps and leaner care pathways to create a wider impact!

Next Steps

- Presenting ideas internally and externally
- Empowering clinical leaders
- Education and training
- Sustainability working groups
- Continued work with third parties
